

Develop A Python Script

Date	17 September 2022
Team ID	PNT2022TMID48274
Team Members	Kaviyapriya.M, Nagarani.S, Nandhini.R, Ramya.P
Project Name	IoT Based Safety Gadget for Child Safety Monitoring and Notification.

To Create The Python Script:

Steps:

1. Write a sample python program to print a number.

The screenshot shows a Windows desktop environment. On the left, a text editor window titled 'basic.py - C:/Users/user/AppData/Local/Programs/Python/Python37/basic.py (3.7.0)' displays the following Python code:

```
File Edit Format Run Options Window Help
print('Hollo, World!')
#this program adds two numbers

num1=1.5
num2=6.8

#Add two numbers
sum=num1+num2

#display the sum
print('The sum of {0} and {1} is {2}'.format(num1,num2,sum))
```

On the right, a 'Python 3.7.0 Shell' window shows the execution of the script. The output is as follows:

```
Python 3.7.0 (v3.7.0:1bf9cc5093, Jun 27 2018, 04:59:51) [MSC v.1914 64 bit (AMD64)] on win32
Type "copyright", "credits" or "license()" for more information.
>>>
Hollo, World!
>>>
=== RESTART: C:/Users/user/AppData/Local/Programs/Python/Python37/basic.py ===
Hollo, World!
The sum of 1.5 and 6.8 is 8.3
>>>
```

The desktop background is a pinkish-red image. The taskbar at the bottom shows the Windows Start button, a search bar, and several pinned applications including Firefox, Google Chrome, VLC media player, and Adobe Reader 9. The system tray on the right indicates the time as 12:30 AM on 17-Oct-22.
